

NOZZLES FOR BOTTLE, DRUM, AND TANK WASHING

TW 0216 SI/Metric

TANK WASHING

When choosing a suitable tank cleaning nozzle, three different designs are available:

- Stationary tank cleaning nozzles
- Rotating tank cleaning nozzles
- Tank cleaning machines

Stationary tank washing nozzles

Stationary nozzles, such as the CLUMP spray head, are characterized by a particularly large cross-section. In addition, these nozzles are extremely low maintenance. Due to the special design of the TW series, only small intake pipes are needed on the tanks.

Rotating tank cleaning nozzles

Rotating nozzles are agent-driven spray heads that remove soiling through their droplet impact pressure and the quantity of cleaning agent. The standard spray angle is 360°. HydroWhirl® S nozzles are used where cleaning needs to be done with a strong fan of liquid, and they are ATEX-approved.

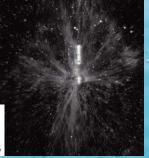

Tank cleaning machines

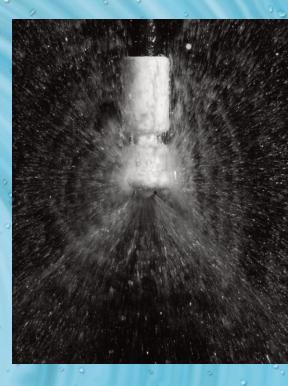

The areas of application of a tank cleaning machine are where the highest cleaning efficiency are necessary, such as:

- Beer tanks, boilers, fermenters, and malt containers
- Raw milk storage, processing containers, spray dryers, and silos

A tank cleaning machine features optimized full jet nozzles, so that containers with diameters of 40 meters or more can be cleaned. The maximum water flow volumes are up to 600 L/min at 10 bar. In order to shorten the cleaning time, target jet cleaners can be equipped with up to 4 full jet nozzles.

ABOUT BETE

At BETE Fog Nozzle, Inc., our success has always been focused on understanding our customers' business and providing effective engineered solutions to their most difficult fluid process challenges. With more than 60 years of experience designing and fabricating spray nozzles, BETE has the engineering expertise on which customers can count.

BETE's mission goes beyond just selling spray nozzles: it is to provide engineered spraying solutions that exceed customer expectations in every detail. Extensive in-house capabilities; including integrated 3DCAD/CAM design, rapid prototyping, investment casting, CNC machining, welded fabrication, and spray testing; make it possible to offer the highest level of quality throughout every phase of production.

The BETE Difference is our unparalleled ability to respond quickly and effectively to any kind of spraying challenge anywhere in the world with the most knowledgeable customer service in the industry.

CHOOSING A TANK WASHING NOZZLE

Adequate coverage and effective scrubbing are of prime importance in bottle, drum, and tank washing. Choosing from the variety of tank washing nozzles can be confusing. In selecting BETE nozzles you should consider the following vessel characteristics and nozzle design criteria: size and shape of vessel to be cleaned, vessel opening, type of material to be removed, and spray coverage.

Size and Shape of Vessel to be Cleaned

BETE's tank washing nozzles can be used to clean, wash, and rinse every size vessel from small bottles, moderately sized tanks, to railroad tankers.

The TW series is the best choice for cleaning small bottles, kegs, and barrels due to its compact design. Medium-sized tanks up to 6m or are best cleaned using the HydroWhirl® S, HydroWhirl Poseidon®, or the CLUMP series because of their omni-directional spray.

Where higher impact and larger coverage is needed, BETE's tank washing machines, the HydroWhirl Orbitor 100 and the HydroWhirl Orbitor, are the perfect choice.

What is ATEX (Ex)?

ATEX is an acronym that stands for 'ATmosphere EXplosible'. At the same time, ATEX is an abbreviation for European Directive 94/9/EC concerning the placement on the market of explosion-protected electrical and mechanical equipment.

All HydroWhirl Orbitor, HydroWhirl Orbitor 100, and HydroWhirl S nozzles are available with ATEX approval.

HydroWhirl®S

slotted rotating spray nozzle for quick, efficient tank cleaning

The HydroWhirl® S nozzle directs the cleaning water through a rotating head at the tip of the spray assembly. This produces a vigorous moving spray action against all areas of the walls of a tank. The spray pattern from the HydroWhirl S head uses impact and repetition to quickly wash the tank. This spray pattern is especially effective at breaking up and removing contaminants.

Advantages of the HydroWhirl S rotary spray nozzle.

- Cleans more quickly, and uses less water and lower pressure than static tank washers
- Lower flow and pressure mean smaller pump size resulting in lower operating costs

The HydroWhirl S nozzle has been carefully designed for long service life.

Low-maintenance bearing design

 Self-cleaning bearings are lubricated by water flow to clear away particles

High-precision machining and finish

- Stainless steel construction corrosion resistant
- Laser-welded design for durable assembly
- Surface finish of o.8 microns Ra or better
- Made from FDA-approved materials for use in Clean-in-Place (CIP) applications

Comprehensive quality control

- Material traceability controlled throughout production
- Lifecycle lab testing validates minimum service life of 300 hours
- All HydroWhirl S nozzle are available with ATEX approval for Zone o.

Design flexibility

- Available in many different sizes and connections: threaded, clip-on, or welded
- Spray Angles: 360°, 90° Up, 90° Down, 180° Up, 180° Down, 270° Up, 270° Down
- Flow range: 4.39 338 L/min (1.26 90.9 gpm)
- Dual bearing design nozzle operates effectively in any orientation

Surface finish ideal for sanitary applications

The HydroWhirl S nozzle is an outstanding combination of design, quality, and engineering. The HydroWhirl S nozzle is ideal for anyone who needs reliable, efficient cleaning of tanks and other interior spaces.

All 360° HydroWhirl S nozzles are available with ATEX approval.

HydroWhirl®S

Tank Washing - Slotted Spray Nozzle

DESIGN FEATURES

- Cleans more quickly, and uses less water and lower pressure than static tank washers
- Surface finish of 0.8 microns R_a or better: ideal for sanitary applications
- Laser-welded design for durability
- Stainless steel construction corrosionresistant material
- Three connections: threaded, clip-on, and welded
- Made from FDA approved materials for use in Clean-In-Place (CIP) applications.

SPRAY CHARACTERISTICS

- Self-cleaning bearings
- Vigorous moving spray action
- Spray Angles: 360°, 90° Down*, 180° Up*, 180° Down, 270° Up, 270° Down,
 *Not available in all flow rates.

Flow rates: 4.39 – 338 l/min
All 360° HydroWhirl S nozzles
are available with ATEX approval
for Zone 0.

Weld On Connections

HydroWhirl Poseidon® spray nozzles for quick, efficient tank cleaning

The HydroWhirl Poseidon tank-washing nozzle directs the cleaning water through a rotating head at the tip of the spray assembly. This produces a slow-moving, high-impact spray action against internal surfaces of the tank. The HydroWhirl Poseidon nozzle head uses impact and repetition to quickly break up and wash away contamination. The combination of the spray pattern and slow rotation of the HydroWhirl Poseidon tank-washing nozzle is especially effective at removing scum rings or tougher, stuck-on material.

Advantages of the HydroWhirl® Poseidon® rotary tank-washing nozzle:

- Cleans more quickly and uses less water and lower pressure than static tank washers
- Complete 360° omnidirectional coverage
- Slow rotation speed provides higher impact and more efficient cleaning.
- Durable PTFE nozzle construction withstands extreme chemical and elevated temperature environments.
- Simple internal design allows reliable flowthrough operation
- Design validated by lab testing to 93 °C (200 °F)
- Maintenance-friendly design allows disassembly, inspection, and reassembly with basic hand tools.
- Made from FDA-approved materials for use in Cleanin-Place (CIP) applications

The HydroWhirl Poseidon tank-washing nozzle has been carefully designed for long service life

Comprehensive Quality Control:

- Material traceability controlled throughout production
- BETE product quality is maintained using a quality system registered to ISO 9001-2008

Design flexibility:

- Available with pipe, tube, or DIN clip-on connections. Threaded connections available upon request.
- Flow range: 58.3 to 333 L/min

The HydroWhirl Poseidon tank washing nozzle is an outstanding combination of design, quality, and performance.

The HydroWhirl Poseidon tank washing nozzle is ideal for anyone who needs a polymer nozzle for reliable, efficient cleaning of tanks and other interior spaces.

HydroWhirl® Poseidon®

Tank Washing - PTFE Spray Nozzle

DESIGN FEATURES

- · Cleans more quickly, and uses less water and lower pressure than static tank washers
- PTFE construction:
 - Ideal for harsh chemical environments
 - Corrosion resistant
- Four connections: threaded pipe, tube, or DIN clip-on
- Made from FDA-approved materials for use in Clean-In-Place (CIP) applications.

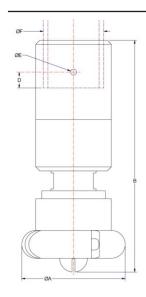

SPRAY CHARACTERISTICS

- Slow spinning, longer spray dwell time on the target surface increases impact over conventional rotating designs
- Complete 360° omnidirectional spray pattern

Flow rates: 14.3 to 307 l/min

BETE Fog Nozzle, Inc.

HydroWhirl Orbitor 100 tank cleaning machine is ideal for high impact cleaning

The HydroWhirl® Orbitor 100 is a versatile tank cleaning machine designed to meet the high standards required in the food, brewing, beverage, dairy, and chemical industries combining high performance cleaning efficiency with extended operating life and reduced life cycle costs.

Advantages of the HydroWhirl Orbitor 100 tank cleaning machine.

- The HydroWhirl Orbitor 100 can be stripped, maintained, and rebuilt in less than 15 minutes.
- The HydroWhirl Orbitor 100 is self cleaning and self lubricating.
- Enhanced external cleaning with dedicated nozzles that clean the external surfaces of the machine and its mounting pipe.
- The HydroWhirl Orbitor 100 is ideal for use in small to medium tanks where the product is difficult to clean and where high impact cleaning is required.
- Designed with minimum moving parts to ensure extended operating life and reduced down time.
- Easily fits through 100 mm (Ø4") openings; or 85 mm (Ø3-35") when nozzle head vertically aligned

Available Versions:

- 4 nozzle machines
- Variable cycle times
- Female connections

HydroWhirl Orbitor 100 Applications:

Typically used where high impingement cleaning is required and where the most efficient use of utilities is necessary.

BREWING & WINERIES

Bright beer tanks, coppers, maltings, brew kettles, fermenters, storage tanks

COATINGS AND PAINTS

Storage silos, process vessels, mixers

FOOD AND DAIRY

Raw milk storage, spray driers, process vessels, storage silos

CHEMICAL

Process vessels, mixers, storage silos

BEVERAGE

Process vessels, storage silos

Key Features and Benefits:

- Designed to meet hygienic standards; external surface finish: 0.5 microns Ra or better
- Self cleaning; self lubricating = no process contamination
- Optimum consumption of water, chemicals, and time = reduced operating costs
- Minimum moving parts = reduced lifecycle costs
- High impact jets; orbital wash pattern = high efficiency cleaning process
- Compact design = will fit through small access flanges and vessel openings
- 4 nozzle configurations

HydroWhirl Orbitor

HydroWhirl® Orbitor 100

High Impact Rotary Tank Cleaning Machine

DESIGN FEATURES

- Easily field-serviced to reduce maintenance costs
- Minimum moving parts to extend operating life
- Self cleaning; self lubricating
- High-impact jets; orbital wash pattern = high efficiency cleaning process
- Ideal for small to medium tanks, easily fits through Ø100 mm (4") openings
- 4 nozzle configurations
- Female connections

SPRAY CHARACTERISTICS

- 360° wash pattern
- Variable cycle times
- High impact cleaning

Flow rates: 44.8 - 198 L/min Working Pressure: 3 - 10 bar

Materials:

Housing and Nozzle Head: 316L

Gears: PEEK + 316 SS

Bushings/Seals: Carbon Filled PTFE

Max. Working Temp.: 95 °C (200 °F) Max. Ambient Temp.: 140 °C (285 °F)

Weight: 2.5 kg

All HydroWhirl Orbitor 100 tank cleaning machines are available with ATEX approval

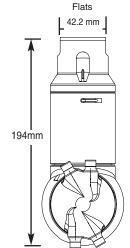

Performance may vary with ATEX models.

HydroWhirl® Orbitor tank cleaning machine is ideal for high impact cleaning

The HydroWhirl® Orbitor is a versatile tank cleaning machine designed to meet the high standards required in the food, brewing, beverage, dairy, and chemical industries combining high performance cleaning efficiency with extended operating life and reduced life cycle costs.

Advantages of the HydroWhirl Orbitor tank cleaning machine.

- The HydroWhirl Orbitor can be stripped, maintained, and rebuilt in less than 15 minutes.
- The HydroWhirl Orbitor is self cleaning and self lubricated.
- Enhanced external cleaning with dedicated nozzles that clean the external surfaces of the machine and its mounting pipe.
- Designed for use where high impact cleaning is required.
- The HydroWhirl Orbitor is ideal for use in larger tanks and where the product is difficult to clean.
- Designed with minimum moving parts to ensure extended operating life and reduced down time.

Available Versions:

- 2 or 4 nozzle machines
- Variable cycle times
- Male or Female connections
- 360° wash pattern
- 180° down wash pattern
- 180° up wash pattern

Typical HydroWhirl Orbitor Applications:

Typically used where high impingement cleaning is required and where the most efficient use of utilities in necessary.

Flow rates: 80 - 600 L/min Working Pressure: 3 - 10 bar

Materials:

Housing: 316L Nozzle Head: 316L Gears: PEEK + 316 SS

Bushings/Seals: Carbon Filled PTFE

Max. Working Temp.: $95 \, ^{\circ}\text{C}$ Max. Ambient Temp.: $140 \, ^{\circ}\text{C}$

Weight: 7.5 kg

Minimum opening size is 5" for either 2nozzle or 4-nozzle standard-capacity model.

All HydroWhirl Orbitor tank cleaning machines are available with ATEX approval.

Jet lengths are effective cleaning lengths

Tank Washing

DESIGN FEATURES

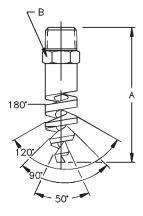

- Clog-resistant spiral design
- Energy efficient
- · Compact design; fits small openings

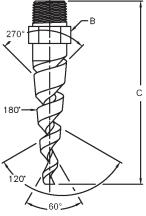

SPRAY CHARACTERISTICS

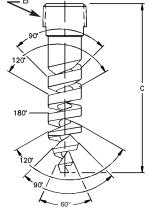

- Easy to maintain
- Unique patterns that spray in opposing directions

Flow rates: 11.4 to 260 L/min

TW 12-TW 20 (180°)

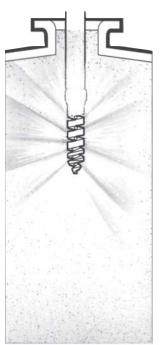

TW 12-TW 20 (270°)

TW 1

Dimensions are approximate. Check with BETE for critical dimension applications.

Flow Rate ($\frac{1}{min}$) = $K\sqrt{bar}$

Standard Materials: Brass, 316 Stainless Steel

Tank Washing Nozzles

DESIGN FEATURES

- Each nozzle in the stationary cluster is a BETE clog-resistant full cone nozzle of the MaxiPass[®] series
- Can be supplied with various other BETE nozzles for any desired application
- Female connection

SPRAY CHARACTERISTICS

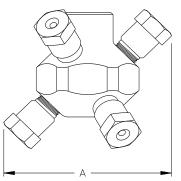

- Spherical omnidirectional coverage
- Six nozzles arranged in cluster to project spray in all directions

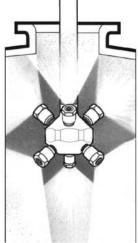

Flow rates: 28.1 to 290 L/min (Special flow rates available)
