# EQUIPMENT AND TANK WASHING SOLUTIONS

TW 0618 SI/Metric

R

## EQUIPMENT & TANK WASHING

When choosing a suitable equipment and tank cleaning solution, three different CIP designs are available:

- Stationary Tank Cleaning Nozzles
- Rotating Tank Cleaning nozzles
- Tank Cleaning Machines

#### **Stationary Tank Washing Nozzles**

Stationary nozzles, also known as static nozzles, have no moving parts. These specialized BETE products include the innovative HydroClaw<sup>®</sup>, and spiral TW. The low-maintenance designs provide sizeable free passage superior to other products on the market. The versatile size range and narrow form of the TW series ensure compatibility with small vessel openings.

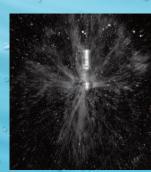

#### **Rotating Tank Cleaning Nozzles**

Rotating tank wash nozzles, like BETE's slotted HydroWhirl® S and PTFE HydroWhirl® Poseidon® series, use the reaction force of the spray media to drive the rotation of the nozzle head. These provide complete 360° coverage and efficient cleaning through impact and repetition. Rotating nozzles ensure a significant increase in tank washing efficiency over static spray balls, saving time and money by reducing water and cleaning agent consumption while decreasing downtime.

#### **Tank Cleaning Machines**

Tank cleaning machines, such as the HydroWhirl® Orbitor and Orbitor100 models, use the spray media flowing through internal gears on the body to rotate sets of high impact jet nozzles through an efficient 2-axis orbital pattern, providing complete 360° coverage. The jet pattern nozzles utilized on these assemblies provide significantly more impact and impingement force than other styles of tank washing nozzles, making them ideal for hard to clean residues and larger vessels.

At BETE Fog Nozzle, Inc., our success has always focused on understanding our customers' business. We provide effective engineered solutions for the most challenging fluid process needs.

BETE's mission goes beyond just selling spray nozzles. It is to provide engineered spraying solutions that exceed customer expectations in every detail. Our in-house capabilities include integrated 3D CAD/CAM design, rapid prototyping, investment casting, CNC machining, welded fabrication, and advanced spray testing. We offer the highest level of quality through every phase of production.

The BETE difference is our ability to respond quickly and efficiently to each spraying challenge, with personal customer service every step of the way. Our team draws on over 65 years of experience in the design and manufacturing of spray nozzles and fluid process fabrications. Engineering expertise you can count on from the premier spray nozzle experts.

### CHOOSING A TANK WASHING NOZZLE

Adequate coverage and effective scrubbing are of prime importance in equipment and tank washing. When selecting BETE nozzles, you should consider the following vessel characteristics and nozzle design criteria: size and shape of the vessel, internals, vessel opening, type of residue to remove, and spray coverage.

#### Size and Shape of the Vessel to Clean

BETE's tank washing nozzles can be used to clean, wash, and rinse every size vessel from small bottles to a wide variety of process tanks and railroad tankers.

The HydroWhirl<sup>®</sup> S and TW series offer the best options for cleaning small bottles, kegs, and barrels due to their compact design.

The free passage of the HydroClaw<sup>®</sup> is an ideal solution for small tanks up to 3m where clogging can lead to downtime. Medium-sized tanks up to 6m are best cleaned using the HydroWhirl<sup>®</sup> S, or the residue-resistant HydroWhirl<sup>®</sup> Poseidon<sup>®</sup> up to 7.6m.

Where higher impact for hard to clean residues or coverage distance for large tanks is needed, BETE's tank washing machines, the HydroWhirl<sup>®</sup> Orbitor 100 and HydroWhirl<sup>®</sup> Orbitor, are an excellent choice.

	100				1000							1

#### What is ATEX (Ex)?

ATEX is an acronym that stands for 'ATmosphere EXplosible'. BETE products are reviewed and approved under ATEX Directive 2014/34/EU concerning equipment and protective systems intended for use in potentially explosive atmospheres.

All HydroWhirl Orbitor, HydroWhirl Orbitor 100, and HydroWhirl S nozzles are available with ATEX approval.

### HydroWhirl<sup>®</sup> S Slotted, Rotating Spray Nozzle for Quick, Efficient Tank Cleaning

The HydroWhirl<sup>®</sup> S nozzle directs the cleaning water through a rotating head at the tip of the spray assembly. This produces a vigorous moving spray action against all areas of the walls of a tank. The spray pattern from the HydroWhirl S head uses impact and repetition to quickly wash the tank. This spray pattern is especially effective at breaking up and removing contaminants.

#### Advantages of the HydroWhirl<sup>®</sup> S rotary spray nozzle.

- Cleans more quickly, and uses less water, and lower pressure than static tank washers
- Lower flow and pressure mean smaller pump size resulting in lower operating costs

## The HydroWhirl<sup>®</sup> S nozzle has been carefully designed for long service life.

#### Low-maintenance bearing design

• Self-cleaning bearings are lubricated by water flow to clear away particles

#### High-precision machining and finish

- Stainless steel construction corrosion resistant
- Laser-welded design for durable assembly
- Surface finish of 0.8 µm (microns) Ra or better
- Made from FDA compliant materials for use in Clean-in-Place (CIP) applications

#### Comprehensive quality control

- Material traceability controlled throughout production
- Quality components carefully designed for long service life
- All HydroWhirl S nozzle are available with ATEX approval for Zone 0

#### Design flexibility

- Available in many different sizes and connections: threaded, clip-on, or welded
- Spray Angles:
- 360°, 90° Up, 90° Down, 180° Up, 180° Down, 270° Up, 270° Down
- Flow range: 4.39 338 L/min (1.26 90.9 gpm)
- Dual bearing design nozzle operates effectively in any orientation

The HydroWhirl S nozzle is an outstanding combination of design, quality, and engineering. The HydroWhirl S nozzle is ideal for anyone who needs reliable, efficient cleaning of tanks and other interior spaces.

All HydroWhirl S nozzles are available with ATEX approval.

## HydroWhirl®S

### Tank Washing - Slotted Spray Nozzle

#### **DESIGN FEATURES**

- Cleans more quickly, and uses less water and lower pressure than static tank washers
- Surface finish of 0.8 μm (microns) R<sub>a</sub> or better: ideal for sanitary applications
- · Laser-welded design for durability
- Stainless steel construction corrosion-resistant material
- Three connections: threaded, clip-on, and welded
- Made from FDA compliant materials for use in Clean-In-Place (CIP) applications

#### SPRAY CHARACTERISTICS

- Self-cleaning bearings
- Vigorous moving spray action
- Spray Angles: 360°, 90° Down\*, 180° Up\*, 180° Down, 270° Up, 270° Down,
  \*Not available in all flow rates

#### Flow rates: 4.39 - 338 L/min

All HydroWhirl S nozzles are available with ATEX approval for Zone 0

### HydroWhirl<sup>®</sup> Poseidon<sup>®</sup> Spray Nozzles for Quick, Efficient Tank Cleaning

The HydroWhirl Poseidon tank washing nozzle directs the cleaning water through a rotating head at the tip of the spray assembly. This produces a slow-moving, high-impact spray action against internal surfaces of the tank. The HydroWhirl Poseidon nozzle head uses impact and repetition to quickly break up and wash away contamination. The combination of the spray pattern and slow rotation of the HydroWhirl Poseidon tank washing nozzle is especially effective at removing scum rings or tougher, viscous material.

#### Advantages of the HydroWhirl® Poseidon® rotary tank washing nozzle

- Cleans more quickly and uses less water and lower pressure than static tank washers
- Complete 360° omnidirectional coverage
- Slow rotation speed provides higher impact and more efficient cleaning
- Durable PTFE nozzle construction withstands extreme chemical and elevated temperature environments
- Simple internal design allows reliable flowthrough operation
- Design validated by lab testing to 93 °C (200 °F)
- Maintenance-friendly design allows disassembly, inspection, and reassembly with basic hand tools
- Made from FDA compliant materials for use in Cleanin-Place (CIP) applications

The HydroWhirl<sup>®</sup> Poseidon<sup>®</sup> tank-washing nozzle has been carefully designed for long service life

#### **Comprehensive Quality Control:**

- Material traceability controlled throughout production
- BETE product quality is maintained using a quality system registered to ISO 9001-2015

#### **Design Flexibility:**

- Threaded, pipe, tube, or DIN clip-on connections are available
- Flow range: 58.3 to 333 L/min

Corrosion resistent PTFE is ideal for harsh chemical environments

The HydroWhirl Poseidon tank washing nozzle is an outstanding combination of design, quality, and performance.

The HydroWhirl Poseidon tank washing nozzle is ideal for anyone who needs a polymer nozzle for reliable, efficient cleaning of tanks and other interior spaces.

## HydroWhirl® Poseidon®

## Tank Washing - PTFE Spray Nozzle

#### DESIGN FEATURES

- Cleans more quickly and uses less water and lower pressure than static tank washers
- PTFE construction:

ØF-

- Ideal for harsh chemical environments
- Corrosion resistant
- Available in threaded, pipe, tube, or DIN clip-on connections
- Made from FDA compliant materials for use in Clean-In-Place (CIP) applications.

#### SPRAY CHARACTERISTICS

- Slow spinning produces longer spray dwell time on the target surface, increasing impact over conventional rotating designs
- Complete 360° omnidirectional spray pattern, other spray angels available upon request

Flow rates: 14.3 to 307 L/min

### HydroWhirl<sup>®</sup> Orbitor Tank Cleaning Machines Ideal for High Impact Cleaning

The HydroWhirl Orbitor and HydroWhirl Orbitor 100 are versatile tank cleaning machines designed to meet the high standards required in the food, brewing, beverage, dairy, and chemical industries combining high performance cleaning efficiency with extended operating life and reduced life cycle costs.

## Advantages of the HydroWhirl<sup>®</sup> Orbitor tank cleaning machines

- The HydroWhirl Orbitor and Orbitor 100 can be stripped, maintained, and rebuilt in less than 15 minutes
- The HydroWhirl Orbitors are self cleaning and self lubricated
- Enhanced external cleaning with dedicated nozzles that clean the external surfaces of the machine and its mounting pipe
- Designed for use where high impact cleaning is required
- The HydroWhirl Orbitors are ideal for use in larger tanks and where the product is difficult to clean
- Designed with minimum moving parts to ensure extended operating life and reduced down time

#### **AVAILABLE VERSIONS**

- 2 or 4 nozzle machines
- Variable cycle times
- Male or female connections
- 360° wash pattern
- 180° down wash pattern
- 180° up wash pattern

#### Typical HydroWhirl<sup>®</sup> Orbitor Applications

Typically used where high impingement cleaning is required and where the most efficient use of utilities in necessary.

#### BREWING

Bright beer tanks, coppers, maltings

#### **COATINGS AND PAINTS**

Storage silos, process vessels, mixers

#### FOOD AND DAIRY

Raw milk storage, spray driers, process vessels, storage silos

#### CHEMICAL

Process vessels, mixers, storage silos

#### BEVERAGE

Process vessels, storage silos

#### Key Features and Benefits:

- Designed to meet hygienic standards; external surface finish of 0.5  $\mu$ m (microns) R<sub>a</sub> or better
- Optimum consumption of water, chemicals, and time = reduced operating costs
- Minimum moving parts = reduced lifecycle costs
- Self cleaning; self lubricating = no process contamination
- High impact jets; orbital wash pattern = high efficiency cleaning process
- Compact design = will fit through small access flanges
- 2 or 4 nozzle configuration = wash pattern variable up to super intense

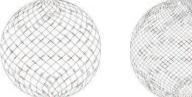

All HydroWhirl Orbitor and HydroWhirl Orbitor 100 tank cleaning machines are available with ATEX approval.

## HydroWhirl®Orbitor

## High Impact Rotary Tank Cleaning Machine

#### **DESIGN FEATURES**

- · Easily field-serviced to reduce maintenance costs
- · Minimum moving parts to extend operating life
- Self-cleaning; self-lubricating
- · High-impact jets; orbital wash pattern = high efficiency cleaning process
- Compact design
- 2 or 4 nozzle configurations = wash pattern variable up to super intense
- Male or female connections

Orbitor 2 nozzle spray pattern

Orbitor 4 nozzle spray pattern

#### SPRAY CHARACTERISTICS

- 360° wash pattern. 180° patterns available on request
- Variable cycle times
- High impact cleaning
- Flow rates: 80 600 L/min
- Working Pressure: 3 10 bar

#### Materials:

Housing and Nozzle Head: 316L Gears: PEEK + 316 SS **Bushings/Seals: Carbon Filled PTFE** 

#### Max. Working Temp.: 95 °C Max. Ambient Temp.: 140 °C Weight: 7.5 kg

Minimum opening size is 5" for either 2nozzle or 4-nozzle standard-capacity modelwith jets vertically aligned.

All HydroWhirl Orbitor tank cleaning machines are available with ATEX approval.

## Tank Washing

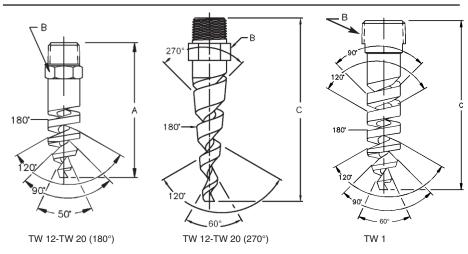

#### DESIGN FEATURES

- Clog-resistant spiral design
- Energy efficient
- Compact design; fits small openings

#### SPRAY CHARACTERISTICS

- Easy to maintain
- Unique patterns that spray in opposing directions

Flow rates: 11.4 to 260 L/min

Flow Rate (  $V_{min}$ ) =  $K \sqrt{bar}$ 

Standard Materials: Brass, 316 Stainless Steel

### HydroClaw<sup>®</sup> Superior Clog-Resistant Nozzle for Ferocious Tank Cleaning

- Triple the free passage of spray balls
- Unique, patent-pending, clog-resistant design with no moving parts
- Complete 360° coverage
- Vigorous rinsing action quickly flushes solids and contamination from vessels

#### Who needs the HydroClaw<sup>®</sup>?

- Wineries: spray balls get clogged with stems, skins, and seeds
- Breweries: spray balls get clogged with grains and hops
- Juice Processing Plants: tank washing nozzles get clogged with fruit seeds and pulp
- Sugar Processing Plants: rotary nozzles jam up with sticky residue
- Tomato Processing Plants: tank washing nozzles get clogged with seeds and skins

#### Advantages of the HydroClaw®

#### Low-maintenance design

- Self-draining and self-flushing design
- No moving parts = low maintenance

#### **High-precision machining**

- 316L stainless steel construction for food-grade and sanitary applications
- Laser-welded for durability

#### Designed with your tank in mind

- Available in a variety of connection sizes and types, including threaded, clip-on and welded.
- Fits through compact openings: either 63.5 mm or 76.0 mm diameter
- Spray Angle: complete 360° coverage for tanks up to 3 m diameter
- Free Passage: allows passage of particles 6.4 mm in diameter; three times the free passage of a comparable spray ball
- Recommended operating pressure: 2 bar
- Low pressure, high flow for quick, energy-efficient rinse

Visit BETE.com for comprehensive spray nozzle tools, case studies and literature.

Wine Fermentation Tank Cleaned with the HydroClaw

## **HydroClaw®**

## Tank Washing - Superior Clog Resistance

#### **DESIGN FEATURES**

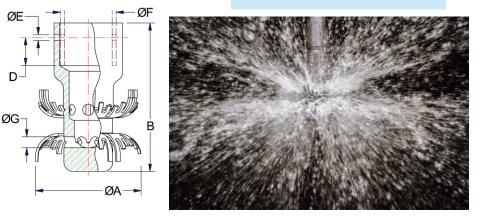

- Patent-pending, clog-resistant design with no moving parts
- Allows passage of particles 6.4 mm in diameter, three times the free passage of a comparable spray ball
- Made from FDA compliant 316L stainless steel for use in food-grade and sanitary Clean-In-Place (CIP) applications
- Low pressure/high flow operation quickly cleans tank walls to reduce overall water consumption compared to a static spray ball
- Self-draining and self-flushing
- Laser-welded for durability
- Available in a variety of connection sizes and types, including threaded, clip-on and welded.
- Clip-on nozzles include low-profile retaining pin for secure connection
- Fits through compact openings: either 63.5 mm or 76 mm diameter

HydroClaw Flow Bates and Dimensions

#### SPRAY CHARACTERISTICS

- Vigorous rinsing action quickly flushes solids and contamination from vessels
- Complete 360° omnidirectional coverage
- Optimum cleaning performance at 2 bar
- Recommended installation 0.6 1.0 m vertically below top of tank

Flow rates: 119 - 442 L/min
